Patient Education Insert

-Apply medication to affected area as prescribed

This medication was compounded by a pharmacy per prescriber request. For external use only. Wash hands before and after use unless the medication is for your hands. Store at room temperature (68 to 77 degrees Fahrenheit). Keep away from children and pets. Do not flush unused medications or pour down a sink or drain. Do not swallow and avoid contact with eyes. Do not use more than your medical provider has instructed you to use. Do not use more often or for longer than you were instructed. Doing any of these may increase the chance of undesirable side effects.

The “Do not use after” date printed on the prescription label is generated using State & Federal compounding laws. Some preparations are made 1-3 days before the prescription is issued, in anticipation of expected demand. If you have any questions or concerns regarding this, please do not hesitate to call and speak to one of our pharmacists.

Do not use if an allergic reaction occurs due to any of the listed active ingredients on the prescription label. Signs of an allergic reaction may include rash hives itching shortness of breath wheezing cough swelling of face, lips, tongue or throat or any other signs.

Contact your medical provider or pharmacy if you have concerns about listed side effects or if you experience unexpected irritation. Notify your medical provider of any medical updates and of all drug changes including over-the-counter and herbal medications.

If you miss an application, apply as soon as you remember. If it is close to the next application, skip the missed application. Do not double applications.

We want to offer you the best service possible. In the event you have a concern or complaint please call the pharmacy at 385-900-1400.

Your medication contains the following active ingredients. Please review the following:

Propylene glycol is found in shampoos, deodorants, skin care lotions and room deodorizers. Normal use of these products is not dangerous or toxic to the skin or airways. However, prolonged or excessive application can cause redness and itching to sensitive skin. Ingestion of propylene glycol could cause irritation, burning sensations to the throat and mouth, nausea and vomiting.

The side effects of prolonged inhalation of propylene glycol found in room deodorizers can cause irritation of the mucous membranes, wheezing, coughing and shortness of breath. It should be noted that regular use of skin lotions and cosmetics have no reported side effects in persons without skin sensitivities.

It is not recommended for use in pregnant women or children under the age of 4.
